Midterm Proposal

Mariam Oke

WEB SPECS

This website will serve as my portfolio. It will be used as a way to document different projects I have done in the past and will do in the future. I could also use it to show potential employers my work when applying for jobs and internships. It will include work that I have done so far in IDM as well as my own personal projects. The pages that are in my website are “About”, “Contact”, and “Work.” The work page has three subcategories: photography, videography and code. Each of these categories will have their own pages. The about page will have a short biography and the contact page will have links to my social media and email.
